HAMMOCKS · FURNITURE *lifestyle*

The Pawleys Island Hammocks story goes back to Carolina Low Country more than 130 years ago. Joshua John Ward, a river boat captain, simply wanted a good night's sleep during sultry summers. He set out with some rope and wood, a little gumption and grit and soon fashioned what would become the basis for our company—the rope hammock—a hand woven bed, two wooden spreader bars, a clew knot with a ring for hanging the hammock. Pretty simple when you think about it.

Our collections, which have grown with simpler times in mind, now include a variety of fabric hammocks and decorative pillows. And because Carolina Low Country is about sitting-a-spell, dropping in on neighbors and sharing a

meal with friends and family, we introduced HDPE better-than-wood furniture several years back.

Original Pawleys Island Furniture, steeped in Low Country tradition is generous in proportion, long on durability and rich in design. From casual seating that lends itself to hours of conversations with a glass or two of sweet iced tea to outdoor dining sets around which the best of friendships are cemented with a meal and a toast, our craftsmen and designers keep these simple experiences in mind.

It's a simple thing to say thank-you, it has a lot to do with how we were raised, but it has so much meaning for us. From our family to yours, thank-you for spending some of your time with us.

THE PAWLEYS ISLAND FURNITURE DIFFERENCE

**Highly designed, distinctly handsome, outrageously durable
outdoor furniture that's practically maintenance-free.**

Pawleys Island Outdoor Furniture is constructed from the highest-quality synthetic materials, our outdoor furniture boasts a timeless, classic look while withstanding your weather's worst.

LUMBER

Though handsomely resembling painted wood, the lumber in our **DURAWOOD™** furniture has none of wood's inherent vulnerabilities to outdoor wear and tear. Durawood™ is high-density polyethylene, or HDPE, made from recycled plastic milk jugs. Heavier and more rigid than wood, Durawood has increased stability for outdoor use and withstands the extreme elements in a coastal climate. This nonabsorbent synthetic lumber makes our outdoor furniture virtually maintenance-free, plus, it will never rot, split, or crack.

HARDWARE

High-quality hardware can be all the difference between attractive and unsightly outdoor furniture. Our Durawood™ furniture includes handsome marine-grade 316 stainless steel hardware, designed to resist rust, corrosion and staining, and to withstand extremes of harsh coastal environments and high temperatures.

JOINTS

Our Durawood™ furniture markedly improves upon traditional lumber-connection techniques to achieve an unprecedented level of overall stability. Our patent-pending interlocking **K JOINT** connection expands on the strengths of standard rabbet and dado joints and is used for joints requiring the most stability. Our **DOWEL JOINT** precision peg-and-groove connection limits play at crucial connection points. And lastly, **MORTISE AND TENON JOINTS**, one of the strongest and simplest woodworking joining techniques, is used in key 90-degree board-into-board joints.

ROPE

For our DuraWood™ Coastal Collection that includes seats and backs of hand-woven rope, we use only the best outdoor rope available—synthetic DuraCord®. Our 3-ply DuraCord®, which we precision-twist ourselves to exceed even U.S. military specifications for strength, is weather-tough and exceptionally colorfast, not to mention as soft as cotton.

Deep Seating with Cushions

Our new line of Durwaood™ **Deep Seating** Furniture is a simple, yet classic modular design with few pieces giving you ability to expand your seating to any length to create an outdoor space all your own.

Pawleys Coastal Collection

Generations back, when heirloom wicker porch furniture started wearing out from years of Lowcountry weather, folks would often patch the holes with rope or cover them over with pillows. Our Porch Furniture celebrate those simple effective solutions, featuring seats of hand-woven synthetic DuraCord® rope. We've also replaced rot-prone wooden frames of old with hardy handsome Durawood™ poly-lumber to keeps things even more relaxed and maintenance-free.
